To: File

Catalyst Energy, Inc. – Lot 580-1 Injection Well located at:

Keating Township
McKean County, Pennsylvania
Lot 580-1 Injection Well: Latitude 41.830586° and Longitude -78.58174°

EPA is undertaking a federal project involving a Class II-D injection well used for disposal permit requested by Catalyst Energy, Inc. of Pittsburgh, Pennsylvania for Lot 580-1 Injection Well. This project is subject to review under Section 106 of the National Historic Preservation Act (NHPA) of 1966, as amended.

The project referenced above involving Lot 580-1 Injection Well is a new permit, however, the well is an existing production well and will be converted to an injection well. This project does not involve any new drilling or land disturbance. Therefore, it is found that the issuance of this permit would not have the potential to cause effects on historic properties.

This memo fulfills EPA's responsibility for the NHPA in the Section 106 process, under 36 CFR § 800.4(d)(1) "No historic properties affected."

EPA is sending a copy of the permit, statement of basis, and public notice to the Pennsylvania Historical & Museum Commission for comment during the public notice of the draft permit.
